

MUSCULOSKELETAL ONCOLOGY ICL TRACK EDUCATION APPLICATION REQUEST

On April 1, 2019, AAOS will begin to accept applications for Instructional Course Lectures (ICLs), Symposia, Orthopaedic Video Theater, Paper and Poster at www.aaos.org for the Academy's 2020 Annual Meeting.

AAOS will offer two education tracks in all classifications, except Basic Science, General and Practice Management:

- **Specialist track:** for those with a specialty interest (for instance those in their first 7 years of practice). This is where most of our opportunity is in tailoring education at a “higher” level.
- **General track:** for those looking for an update on a more basic level. This track lends itself to traditional ICLs covering the basics of the field.

AAOS is seeking the following type(s) of ICL track education in this classification for the 2020 Annual Meeting:

SPECIALIST:

- A *Specialist Case Presentation* Instructional Course Lecture that reviews the most common bone and soft tissue tumors in pediatric and young adults; and provide an in-depth overview of the management of the asymptomatic incidentally discovered tumor in relation to the underlying relevant conditions. Explore best practices in management of errors.
- A *Specialist Technical Skills* Instructional Course Lecture to effectively recognize and develop best practices for metastatic disease. Develop appropriate and durable fixation/management treatment plans - surgical, non-invasive and minimally invasive options.
- A *Specialist Technical Skills* Instructional Course Lecture to evaluate and treat masses noted on common musculoskeletal conditions, and outline practical solutions for safe and effective care.

GENERAL:

- A **General Technical Skills** Instructional Course Lecture that reviews the most current treatment of the most common benign and malignant bone tumors in pediatric and young adult patients.

We ask that you provide this information to your Society Membership as we are seeking ICL Applications in the aforementioned topic(s) which open on April 1 and will close on May 1.

Please feel free to contact April Holmes, holmes@aaos.org, if you have any questions.

Below are the various Instructional Course Lecture (ICL) formats (*please note that ICLs may be selected to be presented as a 1.5-hour course*):

Case Presentation Sessions: Round table format with a moderator and 10 faculty as table facilitators, with 4-6 cases discussed per course. Moderator presents a case and the faculty table facilitator at each table aids in case discussion and plan formulation. Each table presents treatment plan and then moderator presents the final solution using Evidence Based Data including teaching points and references to support selected treatment. **This application must list a moderator plus 10 orthopaedic faculty table facilitators at time of submission.**

Instructional Course Lecture: Didactic lecture and audience discussion, they represent the tried and true in Orthopaedics. They often combine the pearls and pitfalls of procedures. Information presented in an ICL represents accepted principles and techniques as well as evidence based practice. **Limited to 3 faculty and a moderator (4 total is maximum faculty limit).**

Technical Skills Sessions: Focuses on positioning, approach and step by step technical tips in an edited 10-minute video. This would be followed by a 10-minute discussion on pearls. Suggested 4-5 topics per session. This type of course works well with unique procedures (nail tibia, or if humerus) or by dividing a more complex operation (Revision TKA). The faculty must be committed to preparing high quality edited video supplemented with slides as necessary *and* provide a 10-minuted edited video that will be provided as a handout. No literature review is mandatory. **Limited to 3 faculty and a moderator (4 total is maximum faculty limit). If application is accepted, the edited 10-minute video is mandatory for this course – due at the time of handout deadline.**

Deadline for ICL Submission is May 1, 2019.
